

CineConnect Complete Backend, Wiring, Demo Data, and Walkthrough Handoff Report

Generated: 2026-07-18

Domain/API: <https://cine.nalexustechologies.com/api/v1>

Security note: includes demo app login credentials only; server/root/database passwords are intentionally excluded.

Executive summary

- Backend creation is complete for the planned Phase 0-12 scope and deployed.
- Flutter/backend wiring is implemented through M10 cleanup passes; automated tests and route-level browser smoke pass.
- Demo data is inserted across all major domains in production MySQL using three idempotent seed slices.
- Current strongest validation: 361 Flutter tests, production web build, and 82 route screenshots with zero runtime/error route events.
- Remaining acceptance blocker: human login-based visual walkthrough per portal.

Area	Status	Estimate	Evidence
Backend/API/database	Complete for planned backend scope	98-100%	Phase 0-12, migrations/smokes, production health
Flutter backend wiring	Mostly complete; M10 awaits human acceptance	90-95%	analyze/test/build/browser route pass
Demo data plan	Seeded across all major domains	95-100%	slices 1-3 idempotent in production
Manual visual acceptance	Still required	0-20%	screenshots exist; human walkthrough pending
Business/provider readiness	Needs owner input	30-50%	payments/providers/legal still dummy or pending

What is already functional

- Auth, KYC, upload/files, profile/portfolio, marketplace, saved search, shortlist.
- Projects, requirements, project room, bookings, negotiations, availability, chat.
- Contracts, signatures, legal reviews, addendums.
- Sandbox/manual payments, payment proofs, finance review, ledger, receipts, payout accounts.
- Location/equipment operations, inspections, damage claims, safety checks/incidents/check-ins.
- Insurance policies/claims/evidence.
- Agency, brand, model, and distribution specialist portals.
- Reviews, reports, blocks, moderation, disputes, support, announcements, notifications.
- Personal/admin dashboards, admin analytics, and supported CSV exports.

What is not done / requires input

Item	Status / required action
Final human walkthrough	Still required: log into Chrome/macOS/iPhone and visually confirm every seeded portal screen.
Real payment rails	Dummy/sandbox: bank transfer and card payment need real details/provider/webhooks.
Production providers	Need owner credentials for object storage/CDN, email, SMS/OTP, Firebase push, monitoring, backups.
Legal/business policy	Need final Terms, Privacy, retention, dispute, tax/invoice, safety wording.
Phone/address reveal policy	Needs business sign-off on exact reveal timing/rules.
Production posture	API healthy, but not real-money production until provider inputs are complete.

Dummy / preview / fallback areas

Area	Current behavior
Demo/offline fallback	Many *_demo_data.dart files intentionally remain for offline/error fallback.
Exports	Live exports support bookings, ledger, admin_disputes; PDF/domain-specific exports are preview unless backed by those.
Super Admin settings	Contract template/revenue setting buttons are preview/backend-gap without deployed mutation endpoints.
Inspection/media/checklist previews	Some controls need live booking/property/provider/inspection/file IDs before safe mutation.
Brand/agency finance shortcuts	Some verification/payment shortcut controls are preview-only; list/read surfaces are live where available.
OTP/biometric	Demo UI exists; real provider/device wiring requires credentials.

Demo data inserted

- Slice 1: 111 users, 220 files, 60 KYC submissions, profiles/listings/projects/requirements/project-room/saved-search/shortlist/provider foundations/availability.
- Slice 2: bookings, offers, negotiations, chat, contracts, legal reviews, payment schedules/milestones/proofs/receipts/ledger/fees/payout accounts.
- Slice 3: operations, safety, insurance, agency, brand, distribution, reviews, reports, moderation, disputes, support, announcements, notifications, exports.

Automated validation evidence

- Headless browser walkthrough: 82 routes, screenshots in docs/m10_walkthrough_screenshots, error route count 0.
- flutter analyze: pass.
- flutter test with production API define: pass, 361/361.
- flutter build web with production API define: pass.
- Production /health/ready: database OK, Redis OK.

Portal-by-portal status summary

Portal	Functional/live	Partial/dummy/fallback notes
Core/shared	Auth, role selection, KYC, notifications, reviews/report/block, payments, ledger, contract viewer.	Forgot password partial; role selection/profile switcher have fallback/empty states.

Portal	Functional/live	Partial/dummy/fallback notes
Director / Producer	Projects, marketplace, shortlist, booking, bargaining, contracts, payments, room, reports.	Create project/booking request have partial/fallback paths.
Actor / Talent	Profile, portfolio, availability, opportunities, offers, contracts, earnings, reputation, safety.	Counteroffer partial when no live booking ID; demo fallback retained.
Location Owner	Listing/pricing/rules, route rendering, operations API exists.	Some inspection/check-in/out controls need live IDs; listing wizard partial.
Media / Equipment	Provider profile, inventory, packages, terms, route rendering.	Some availability/handover/return controls need live item/inspection IDs.
Crew Services	Routes render; availability wired through shared availability.	Profile/portfolio proof/order controls remain preview fallback.
Casting Agency	Dashboard, roster, audition inbox, candidates, self-tapes, commission data seeded.	Some shortlist/payment shortcuts preview-only.
Brand / Sponsor	Profile, opportunities, applications, terms, deliverables, metrics seeded.	Composer partial; some campaign/payment shortcuts preview-only.
Legal Partner	Dashboard, review detail, addendum/history surfaces.	Template mutation/review change controls partial/backend-gap.
Insurance / Safety	Dashboard, records, claims, evidence seeded.	Some incident/safety preview controls remain fallback.
Distribution Partner	Profile, contacts, release coordination, reports.	Mostly live with demo fallback.
Super Admin	Dashboard, KYC, payments, moderation, disputes, support, broadcasts, analytics, exports.	Some template/revenue settings and unsupported export buttons preview-only.

Screen-level implementation table

Screen	Route	Backend consumer	Status	Verification
Splash	/	AuthController.bootstrap/refresh	yes	analyze/widget suite
Login	/login	AuthController.login	yes	analyze/widget suite
Signup	/signup	AuthController.register	yes	analyze/widget suite
Forgot password	/forgot-password	AuthController.forgotPassword	partial	analyze/widget suite
Role selection	/roles	AuthController.roles	fallback	analyze/widget suite
Profile role switcher	/profile/roles	AuthController.setPrimaryRole	empty	analyze/widget suite
Settings logout	/settings	AuthController.logout	yes	analyze/widget suite
KYC upload	/verification/upload	UploadRepository via AuthController.uploadFile, then AuthController.createAndSubmitKyc	yes	analyze/widget suite + backend binary-flow integration
Verification status	/verification/status	AuthController.myKycSubmissions	yes	analyze/widget suite
Admin KYC queue	/admin/verifications	AuthController.adminKycSubmissions	yes	analyze/widget suite + HTTP smoke
Admin KYC detail	/admin/verifications/:id	AuthController.adminKycSubmission/adminKycDecision	yes	analyze/widget suite + HTTP smoke
Director marketplace discovery	/director/marketplace	AuthController.marketplaceListings/createSavedSearch/addToDefaultShortlist	yes, demo fallback	analyze/widget suite + HTTP smoke
Director shortlist board	/director/shortlist	AuthController.shortlistBundle/deleteSavedSearch/updateShortlistItem/deleteShortlistItem	yes, demo fallback	analyze/widget suite + production HTTP smoke
Actor/talent profile builder	/talent/profile	AuthController.cities/myProfile/talentProfile/updateMyProfile/updateTalentProfile/publishMarketplaceListing	yes, local fallback	analyze/widget suite
Actor/talent portfolio & showreel	/talent/portfolio	AuthController.portfolioItems/createPortfolioItem/updatePortfolioItem/deletePortfolioItem plus UploadRepository via AuthController.uploadFile	yes, demo fallback	analyze/widget suite + production HTTP smoke
Director projects list	/director/projects	ProjectsScope.projects	yes, demo fallback	analyze/widget suite + production HTTP smoke
Director create project wizard	/director/projects/create	ProjectsScope.createProject	partial	analyze/widget suite + production HTTP smoke
Director project detail	/director/projects/:id	ProjectsScope.project	yes, demo fallback	analyze/widget suite + production HTTP smoke
Director requirement builder	/director/projects/:id/requirements	ProjectsScope.requirements/createRequirement	yes, demo fallback	analyze/widget suite + production HTTP smoke
Director project room	/director/room	ProjectsScope.room/createRoomItem/linkProjectFile plus UploadRepository via AuthController.uploadFile	yes, demo fallback	analyze/widget suite + production HTTP smoke
Director booking request	/director/booking-request	ProjectsScope.projects, AuthController.marketplaceListings, BookingsScope.createAndSendBooking	partial, demo fallback	analyze/widget suite + production HTTP smoke
Director bargaining center	/director/bargaining	BookingsScope.negotiations	yes, demo fallback	analyze/widget suite + production HTTP smoke
Director negotiation thread	/director/negotiation	BookingsScope.negotiation/createCounterOffer/acceptOffer	yes, demo fallback	analyze/widget suite + production HTTP smoke
Actor/talent availability calendar	/talent/availability	BookingsScope.availability/createAvailability	yes, demo fallback	analyze/widget suite + production HTTP smoke
Actor/talent opportunity inbox	/talent/opportunities	BookingsScope.opportunities/acceptOffer	yes, demo fallback	analyze/widget suite + production HTTP smoke

Screen	Route	Backend consumer	Status	Verification
Actor/talent offer detail	/talent/offers/:id	BookingsScope.booking/acceptOffer/rejectBooking	yes, demo fallback	analyze/widget suite + production HTTP smoke
Actor/talent counteroffer composer	/talent/counteroffer	BookingsScope.createCounterOffer for live BKG-* ids	partial, demo fallback	analyze/widget suite + production HTTP smoke
Booking chat	/booking/chat	BookingsScope.conversation/sendMessage/pinMessage	yes, demo fallback	analyze/widget suite + production HTTP smoke
Director contract center	/director/contracts	ContractsScope.contracts/generateForBooking/requestLegalReview, BookingsScope.bookings	yes, demo fallback	analyze/widget suite + production HTTP smoke
Actor/talent contract signing	/talent/contracts	ContractsScope.contracts and shared contract viewer for signature/correction	yes, demo fallback	analyze/widget suite + production HTTP smoke
Shared contract viewer	/contract	ContractsScope.contract/sign/createAddendum	yes, demo fallback	analyze/widget suite + production HTTP smoke
Legal dashboard	/legal	ContractsScope.legalReviews	yes, demo fallback	analyze/widget suite + production HTTP smoke
Legal review detail	/legal/contract-review	ContractsScope.legalReview/decideLegalReview	yes, demo fallback	analyze/widget suite + production HTTP smoke
Legal template review	/legal/template-review	ContractsScope.templates	partial, demo fallback	analyze/widget suite
Legal addendum review	/legal/addendum-review	ContractsScope.contracts addendum surface	partial, demo fallback	analyze/widget suite + production HTTP smoke
Legal review history/billing	/legal/history-billing	ContractsScope.legalReviews history surface	partial, demo fallback	analyze/widget suite + production HTTP smoke
Shared payment proof upload	/payments/proof	PaymentsScope.schedules/submitProof plus UploadRepository for payment_proof files	yes, demo fallback	analyze/widget suite + production HTTP smoke
Shared receipts ledger	/payments/ledger	PaymentsScope.ledger	yes, demo fallback	analyze/widget suite + production HTTP smoke
Director payment center	/director/payments	PaymentsScope.dashboard	yes, demo fallback	analyze/widget suite + production HTTP smoke
Actor/talent earnings security	/talent/earnings	PaymentsScope.dashboard/payoutAccounts/createSandboxPayoutAccount	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin payments hub	/admin/payments	PaymentsScope.adminProofs/ledger	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin payment queue	/admin/payment-queue	PaymentsScope.adminProofs	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin payment review	/admin/payment-review/:id	PaymentsScope.adminProof/decideProof	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin receipts ledger	/admin/payments/ledger	shared ledger rows plus existing admin ledger filters	demo fallback	analyze/widget suite
Location listing wizard	/location-owner/listing-wizard	OperationsScope.createLocationProperty/createLocationSpace/createLocationPricing/createLocationRule	partial, demo fallback	analyze/widget suite + production HTTP smoke
Media/equipment provider profile	/media-equipment/provider-profile	OperationsScope.equipmentProfile/upsertEquipmentProfile	yes, demo fallback	analyze/widget suite + production HTTP smoke
Media/equipment inventory manager	/media-equipment/inventory	OperationsScope.equipmentItems/createEquipmentItem	yes, demo fallback	analyze/widget suite + production HTTP smoke
Insurance dashboard	/insurance	InsuranceScope.dashboard	yes, demo fallback	analyze/widget suite + production HTTP smoke
Insurance shoot records	/insurance/records	InsuranceScope.policies	yes, demo fallback	analyze/widget suite + production HTTP smoke
Insurance claim support	/insurance/claims	InsuranceScope.claims/decideClaim	yes, demo fallback	analyze/widget suite + production HTTP smoke

Screen	Route	Backend consumer	Status	Verification
Casting agency dashboard	/agency	SpecialistScope.agencyProfile/auditions	yes, demo fallback	analyze/widget suite + production HTTP smoke
Casting agency roster	/agency/roster	SpecialistScope.agencyRoster	yes, demo fallback	analyze/widget suite + production HTTP smoke
Casting agency audition inbox	/agency/auditions	SpecialistScope.auditions/updateAuditionStatus	yes, demo fallback	analyze/widget suite + production HTTP smoke
Brand dashboard	/brand	SpecialistScope.brandProfile/brandOpportunities	yes, demo fallback	analyze/widget suite + production HTTP smoke
Brand profile	/brand/profile	SpecialistScope.brandProfile/upsertBrandProfile	yes, demo fallback	analyze/widget suite + production HTTP smoke
Brand opportunity composer	/brand/opportunity-composer	SpecialistScope.createBrandOpportunity	partial, demo fallback	analyze/widget suite + production HTTP smoke
Model campaign categories	/model	SpecialistScope.modelProfile/updateModelCampaignCategories	yes, demo fallback	analyze/widget suite + production HTTP smoke
Model usage rights	/model/usage-rights	SpecialistScope.modelUsageRights/createModelUsageRight	yes, demo fallback	analyze/widget suite + production HTTP smoke
Model usage rates	/model/rate-by-usage	SpecialistScope.modelUsageRates/createModelUsageRate	yes, demo fallback	analyze/widget suite + production HTTP smoke
Model brand safety	/model/brand-safety	SpecialistScope.modelRestrictedCategories/updateModelRestrictedCategories	yes, demo fallback	analyze/widget suite + production HTTP smoke
Distribution dashboard	/distribution	SpecialistScope.distributionProfile/distributionProjects	yes, demo fallback	analyze/widget suite + production HTTP smoke
Distribution contacts	/distribution/contacts	SpecialistScope.distributorContacts	yes, demo fallback	analyze/widget suite + production HTTP smoke
Distribution release coordination	/distribution/release	SpecialistScope.distributionProjects/updateDistributionProject	yes, demo fallback	analyze/widget suite + production HTTP smoke
Distribution reporting	/distribution/reports	SpecialistScope.distributionReports	yes, demo fallback	analyze/widget suite + production HTTP smoke
Shared notification center	/notifications	TrustSafetyScope.notifications/markNotificationRead/markAllNotificationsRead	yes, demo fallback	analyze/widget suite + production HTTP smoke
Shared ratings & review	/review	TrustSafetyScope.createReview/createReport for live booking ids	yes, demo fallback	analyze/widget suite + production HTTP smoke
Shared report & block	/report	TrustSafetyScope.reportReasons/createReport/blockUser	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin review hub	/admin/review-hub	TrustSafetyScope.adminModerationCases/adminDisputes/adminSupportTickets live summary	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin content moderation queue	/admin/content-moderation-queue	TrustSafetyScope.adminModerationCases/decideModerationCase	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin dispute center	/admin/disputes	TrustSafetyScope.adminDisputes/decideDispute	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin dispute case file	/admin/disputes/:id	TrustSafetyScope.adminDisputes/decideDispute live decision strip	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin support CRM	/admin/support	TrustSafetyScope.adminSupportTickets/updateSupportTicket/createSupportMessage	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin broadcast announcements	/admin/broadcasts	TrustSafetyScope.announcements/createAnnouncement/publishAnnouncement	yes, demo fallback	analyze/widget suite + production HTTP smoke
Portal dashboard KPI strips	main portal dashboards	AnalyticsScope.personalDashboard via /me/dashboard	yes, demo fallback	analyze/widget suite + production HTTP smoke

Screen	Route	Backend consumer	Status	Verification
Super Admin dashboard	/admin/dashboard	AnalyticsScope.adminDashboard	yes, demo fallback	analyze/widget suite + production HTTP smoke
Super Admin analytics	/admin/analytics	AnalyticsScope.adminAnalytics/createExport(admin_disputes)	yes, demo fallback	analyze/widget suite + production HTTP smoke
Supported CSV exports	report/ledger/admin CSV actions	AnalyticsScope.createExport/export/exports for bookings, ledger, admin_disputes	yes, live error fallback	analyze/widget suite + production HTTP smoke

Recommended manual walkthrough order

- Super Admin: dashboard, KYC, payments, moderation, disputes, support, broadcasts, analytics, exports.
- Director/Producer: projects, marketplace, shortlist, booking, bargaining, contracts, payments, room, reports.
- Actor/Talent: profile, portfolio, availability, opportunities, contracts, earnings, reputation, safety.
- Provider portals: model, location, equipment, crew, agency, brand, legal, insurance, distribution.
- Record any screen showing fallback-only data where seeded live data should appear.

Final recommendation

Ready for controlled manual demo walkthrough. Not ready for real-money/public production launch until owner inputs, provider credentials, legal copy, and human visual acceptance are complete.
